

## Dunkettle

Progress Update – 12<sup>th</sup> of April 2019

### Dunkettle Interchange Project:

Upgrade Dunkettle to a largely free-flow interchange to alleviate traffic congestion. More information at [www.dunkettle.ie](http://www.dunkettle.ie)

*Layout of upgraded Dunkettle Interchange*

- Ground investigation works have now reached substantial completion on the site and the ground conditions encountered are currently being assessed.
- Environmental works will continue at the site over the coming months. Following on from monitoring works already carried out, a number of mitigation measures have already been implemented. More information on this key element of the project can be found at [www.dunkettle.ie/environment](http://www.dunkettle.ie/environment) – see photographs below.
- The Dunkettle project website [www.dunkettle.ie](http://www.dunkettle.ie) continues to attract visitors. Visitor numbers to the traffic website [www.dunkettletraffic.ie](http://www.dunkettletraffic.ie) are also increasing significantly and we hope to launch a traffic app over the next few weeks. Our hope is that the app will make real time journey time information and real time information on traffic flows at various parts of the network more readily available – a demo of the app can be viewed here <https://www.youtube.com/watch?v=SMCvjRHu67E>.
- In parallel with the design development over the coming period, there will be an increasing focus on exploring options and measures aimed at minimising delay and congestion at the Interchange both before and during the works. If you are interested in obtaining further details under this heading,

please contact us using the contact details below. Members of the project team will be more than happy to visit individual business or businesses clusters with a view to setting out what can be achieved.
