

Dunkettle

Progress Update – 18th of April 2019

Dunkettle Interchange Project:

Upgrade Dunkettle to a largely free-flow interchange to alleviate traffic congestion. More information at www.dunkettle.ie

Layout of upgraded Dunkettle Interchange

- The main focus on site over the coming period will be on developing the detailed design for the project.
- Further offline advance works will be progressed during May, June and July. Details will follow in future updates but no traffic disruption will be caused by these works.
- Under the heading of reducing traffic volumes, members of the Dunkettle project team visited the Laya Healthcare premises in Little Island on Wednesday the 17th of April 2019. The aim of the visit was to inform attendees in relation to the upcoming works and to discuss traffic reduction measures that could be put in place before and during the Dunkettle works to the benefit of all commuters. Options explored included carpooling, flexitime working, working from home etc. The photographs below show the large attendance at the event and the project team and Laya Healthcare staff.
- Project team members are available to meet individual businesses or business clusters going forward. If this is of interest, please contact us using the contact details below.
