## **Dunkettle Interchange Project - Advance Works**

*Upgrade Dunkettle to a largely free-flow interchange to alleviate traffic congestion.*

- Earthworks and embankment construction for the free flow slip road from the N8 to the M8 towards Dublin and pedestrian/ cycleway is continuing in the area immediately west of the M8 and north of the N25 as shown in the photographs above and below.
- To accommodate upcoming service ducting works, a night-time road closure will be required on the N25 westbound (north of Pfizer) next week on Monday 27th January 2020, with local diversion routes in place from 10 p.m. to 5 a.m.
- There will be night-time lane closures for the installation of service ducting at Dunkettle Interchange, south of the roundabout, with through traffic being

maintained from Tuesday 28th to Thursday 30th January – no significant disruption to traffic is anticipated as a result of these traffic management arrangements.

- Preparatory works are ongoing in advance of piling works for the reinforced concrete protection slab to protect a length of the existing gas transmission main south of the N25 National Primary Road near the Pfizer northern boundary. Piling works will commence in early February 2020.
- The 600mm diameter watermain diversion is ongoing in the North Esk area of the site and will continue for the coming weeks.
- Ground investigation for the Dunkettle Advance Intelligent Transport System (ITS) is underway and will focus on locations along the N40 eastbound between Bloomfield Interchange and the Jack Lynch Tunnel, on the central median of the N25 during week commencing Monday 27th January 2020. These on-road works will be progressed under night-time lane closures in order to ensure that there will be no significant disruption to traffic.
- Further details on the items above and any upcoming works will continue to be provided via the weekly updates.

## Dunkettle Interchange Project - Dunkettle Live Traffic App

- The traffic app **Dunkettle Live** is available as a free download on the [Google Play store](#) and the [Apple App store](#).
- Dunkettle Live has been developed to provide motorists with real-time traffic information with live video streaming from the main approaches to the interchange and live journey times through the junction, to and from all of the major routes: M8, N40, N25, N8.
- It is hoped that this information may assist commuters with flexible working arrangements to re-schedule their journeys through the interchange to avoid peak traffic periods as people become increasingly aware of the free availability of real time traffic information on all approaches to the Dunkettle Interchange.
- We would welcome any comments in relation to the app to [roadconstruction@ccc-site.com](mailto:roadconstruction@ccc-site.com)

**Dunkettle Live App:** download from [Apple App store](#) or from [Google Play store](#)

As always, if there are any queries or comments in relation to these works, please contact us at:

**Phone:** 1800 810077 (at any time),

**Email:** [roadconstruction@ccc-site.com](mailto:roadconstruction@ccc-site.com).
