Dunkettle Interchange

Upgrade Project

Upgrade Dunkettle to a largely free-flow interchange to alleviate traffic congestion.

- Ground investigation works are continuing across the site and these works will continue into 2021. Over the coming week we will be trying out night works at the Dunkettle Interchange Roundabout centre island in order to confirm the ground conditions underlying the roundabout.
- Site clearance works are also well advanced at this stage throughout the site and these works will continue intermittently up to the Christmas break.

- Works are progressing well in the area between the Upjohn premises and the N25 westbound lanes. We hope to complete the gas transmission main protection works at this location before the Christmas break. See photograph below.

Concrete protection slab installation works ongoing at the gas transmission main location

- The ground investigation works referenced above also include an assessment of ground conditions underlying the tidal holding ponds adjoining the N25 westbound lanes. See photograph below.

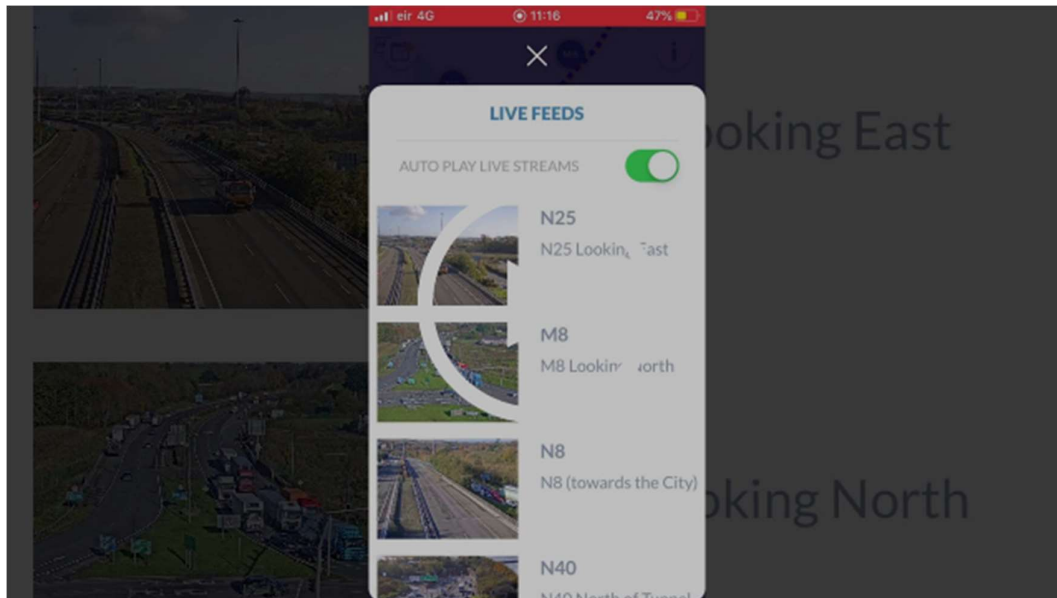

Temporary platform in place to facilitate ground investigation works at the intertidal pond area. The platform will be removed over the coming days.

N40 Intelligent Transport Systems

Installation of gantry mounted Variable Message Signs and other infrastructure to display traffic information such as journey times.

- The auxiliary lane on the N40 eastbound between Bloomfield Interchange and Mahon Interchange will be closed from 10.00 pm on Thursday 10th December 2020 to 5.00 am on Friday 11th December 2020 to facilitate removal of the previously installed traffic management measures at this location.
- Similar process will take place on the N40 westbound immediately south of the Jack Lynch Tunnel, again in order to remove previously installed traffic management measures.
- No significant disruption to traffic is anticipated as a result of ITS works over the coming week.

Dunkettle Live Traffic App

- With traffic volumes likely to increase significantly over the coming weeks, motorists are again reminded of the availability of the Traffic App. The App will assist greatly in rescheduling planned journeys to off-peak times.

Contact Us

The level of activity associated with the Dunkettle Interchange Upgrade Works is ramping up significantly and will increase further as we head into 2021. Hopefully, Covid-19 permitting, we will be in a position to open our Scheme Information area (located at the main site office at Inchera, Little Island) to the general public before the end of 2021.

In the meantime however, if you have any queries or comments in relation to the Scheme you are invited to contact us at any time by the following means:

1. You can forward queries to us at any time via email to roadconstruction@ccc-site.com. You are assured that responses will be issued to all queries in a timely manner.
2. We can also be contacted at any time via the free phone number (1800 810077). If

the free phone operator cannot immediately respond to your query you will receive a follow up phone call from a member of the Project Team fully clarifying any issues arising.

3. If you would prefer an interactive conversation regarding any particular issue, again please contact us via the email address above – Project Team members will then arrange a Zoom call or equivalent with you at a time that suits, again with the aim of fully addressing your queries/comments.

Further information on the Dunkettle Scheme can be accessed www.dunkettle.ie.

Real time traffic information can be accessed via www.dunkettletraffic.ie or on the Dunkettle Live App ([Apple App store](#) and [Google Play store](#)).

New subscribers to the newsletter can register: www.dunkettle.ie/newslettersignup

Your email address is on a list that we use to keep you informed on the progress on the N40 and Dunkettle Interchange works.
