

Dunkettle Progress Update

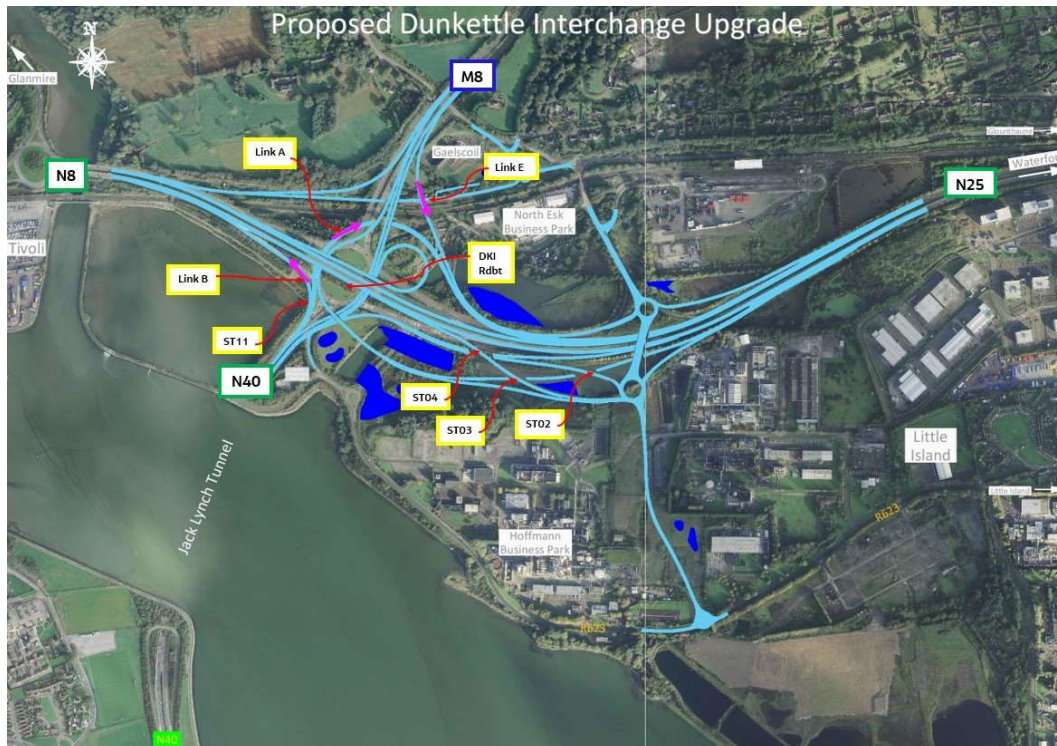

04th November 2022

Twitter

Website

- Motorists are again reminded that speed control measures will be in place across the site on a continuous basis over the coming weeks

- The aerial shot below shows the works at Structure ST11 - the new Jack Lynch Tunnel retaining walls, progressing towards completion. As noted in last week's update, we still hope to fully remove the temporary traffic management (associated with the crane) from this area during W/C 7th November 2022.

Works ongoing adjacent to the N40 northbound between the Jack Lynch Tunnel & Dunkettle Interchange Roundabout.

- Works are continuing at Structures St02, St03 & St04 south of the N25 westbound. We hope to complete all of these structures by early 2023 – see photograph below.

Works ongoing south of the N25 westbound at Structures St02, St03 & St04.

- The M8 southbound will revert to two lanes before the end of this month – see photograph below.

The M8 southbound approach to the Dunkettle Interchange.

- We now expect to open a number of further new link roads before the end of this month – further details will be provided in next week's update. The aerial shot below provides a good indication of the scope of works being progressed currently in the vicinity of the Dunkettle Interchange Roundabout.

Works ongoing on Link A, Link B and Link E.

We have again attached the video of the new access to Little Island/Glounthaune from the N8 eastbound via Links T, H & Q which is now open to traffic.
