

Dunkettle Progress Update

31st March 2023

Twitter

Website

- Motorists are again reminded that speed control measures, coupled with CCTV monitoring are in place across the site and will remain in place over the coming months.

- From a structures point of view, the deck of Structure ST04 has been poured as planned yesterday, Thursday 30th March 2023 – see photograph below.
- Steel fixing works are progressing well at Structure ST03 and we remain on track to cast this bridge deck by mid-April 2023.

Works ongoing on site for the casting of the Structure ST04 bridge deck alongside the N25 westbound.

- Gantry directional signage has been installed at various locations across the site during the week – see photograph below. The works are being undertaken under night-time working in order to minimise the impact on motorists.

Advance directional signage installed on site during the period for Link K.

- Bridge deck waterproofing works are ongoing at the existing Interchange Structures ST17 & ST18 – see photograph below. This water proofing treatment is also required on the existing Structures ST14 & ST15 – see layout plan above. These works will necessitate short term road closures – details of the same will be provided in advance of the works in the normal way.

Bridge deck waterproofing works ongoing at the location of the existing Interchange Structures on the N25.

- In overall terms, the works remain on track for completion by the due date of February 2024.

This week's video shows the ongoing works south of the N25 westbound for Links C, K, L & M.
