[Website](#)

- Motorists are again reminded that speed control measures, coupled with CCTV monitoring are in place across the site and will remain in place over the coming months.

- From a Structures point of view, it is now intended to pour the bridge deck at Structure ST03 before the end of April 2023, with a current focus on completing the retaining walls on the approach to Structure ST04 from Structure ST03 – see photograph below.

ST03 steel fixing works nearing completion with ST04 Retaining Wall works ongoing also.

- Surfacing works will recommence on Monday 17th April 2023 with the initial focus on offline works areas initially with possible nightworks on the N25 westbound thereafter – see photograph below.

Upcoming surfacing works alongside the N25 westbound.

- The works area at the existing Interchange Bridges will continue for a number of weeks into May 2023 - see photograph below.

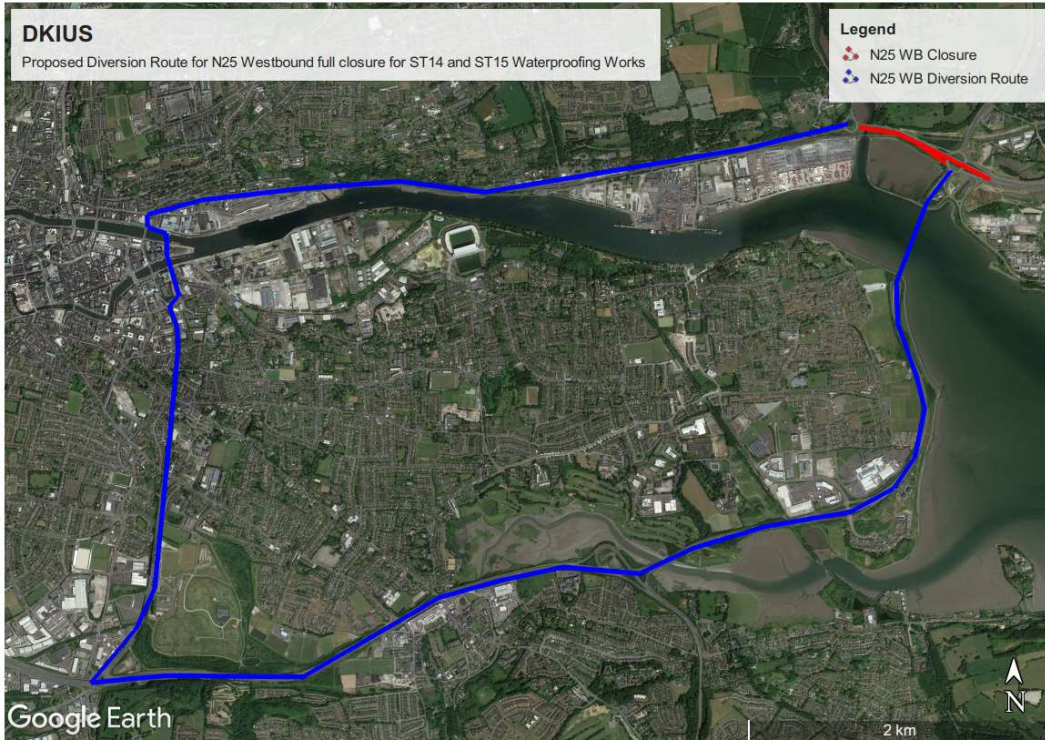

Works ongoing within the central median of the N25 at the existing Interchange.

- Subject to suitable weather conditions, it is still hoped to complete the bridge deck waterproofing works at Structures ST14 & ST15 between 19:30 on Friday 21st April 2023 and 21:00 on Saturday 22nd April 2023 – see photograph below. The N25 Westbound will be closed between the Dunkettle Interchange Roundabout and the Glanmire Roundabout over this time period to facilitate these works with the main diversion route being via the N40 and the Southern Ring Road – see layout plan below.

- We will provide confirmation in relation to these works via an additional update on Wednesday 19th April 2023.

Upcoming works areas on the N25 westbound at Structures ST14 & ST15.

Proposed diversion route for traffic for the N25 Westbound closure via the N40 / South Ring Road.

This week's video shows the ongoing works in the vicinity of Link K south of the N25 Westbound.
