

Dunkettle Progress Update

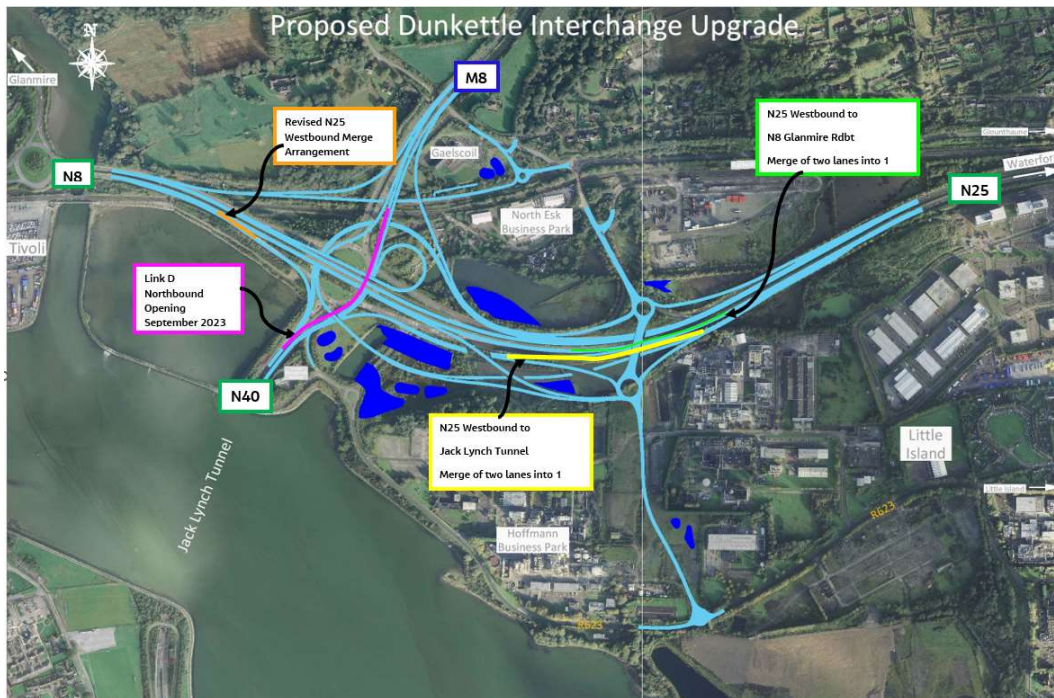

18th August 2023

Twitter

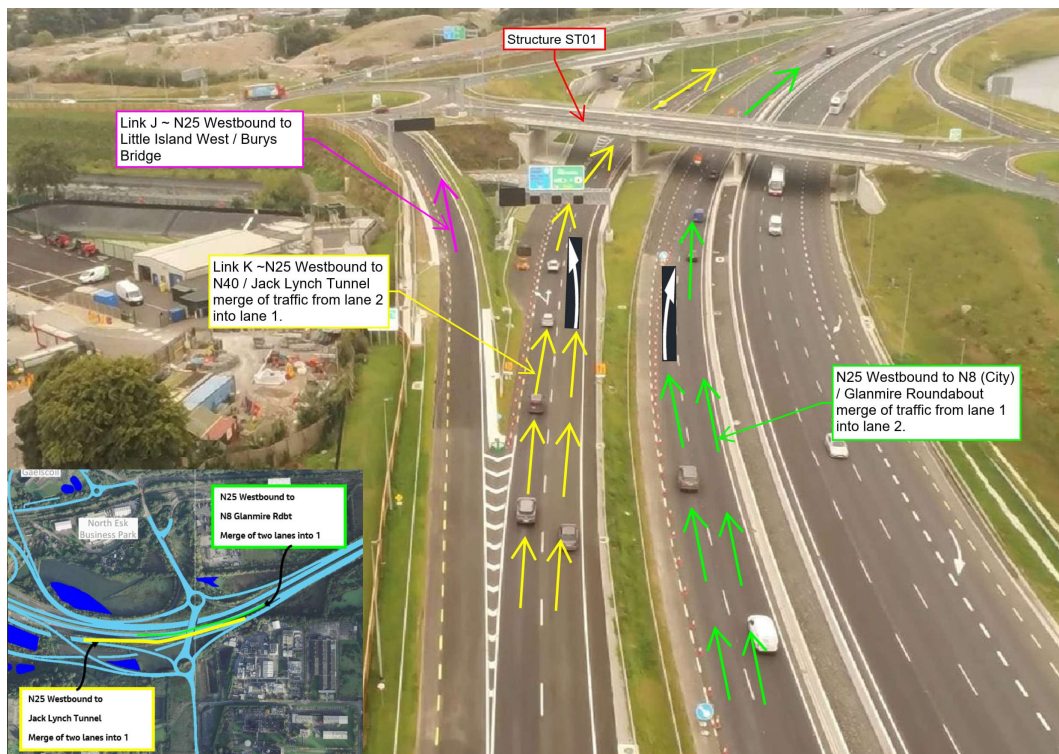

Website

- Motorists are reminded that speed control measures are in place across the site in order to ensure the safety of the workers on site and also the road users.

- The layout of traffic management on the N25 westbound was amended during the week, there is now a taper in place (where two lanes merge into one) on both the N25 westbound heading towards the Tunnel and also on the N25 westbound heading towards the N8 / Glanmire Roundabout – see photograph below. This configuration is required in order to allow the remaining works in online areas to be completed.

Current Traffic Management layout on the N25 Westbound.

- There will also be a new temporary lane configuration in place on the N25 westbound where the merge from the old Interchange Roundabout joins – see photograph below. This layout will be implemented W/C Monday 21st August 2023. It is required in order to complete the remaining waterproofing works in the merge lane / hard shoulder area of Structure ST15 on the N25 Westbound.

Upcoming revised traffic management layout on the N25 westbound in the vicinity of Structure ST15.

- We still intend to open a further link road in September 2023 – this will be Link D northbound which will carry traffic heading from the Tunnel to the M8 northbound. Traffic heading to the N25 eastbound will also be temporarily realigned in the vicinity of the old Interchange Roundabout in order to allow the remaining works in this area to be completed as part of this switch – see photograph below.

Upcoming traffic switch in the vicinity of the N40 northbound approach to the old Interchange Roundabout for M8 northbound traffic.

This week's video shows the revised layout of the N25 Westbound approach to the N40 / Jack Lynch Tunnel.
